## Space and Naval Warfare Systems Command Awards Contract Modification

CHARLESTON, S.C. — L-3 Communications Corporation - Narda Satellite Networks, Hauppauge, N.Y., is being awarded a \$40,092,162 modification to a previously awarded firm fixed price, indefinite delivery/indefinite quantity type contract (N65236-04-D-3119) for an increase in ceiling to cover the procurement of fourteen AF Hub Terminals inclusive of spare and depot spare parts (estimated value \$34,196,869) and ten AN/USC-60A Terminals inclusive of spare and depot spare parts (estimated value \$5,897,402). At least six of the hub terminals are replacing existing terminals that are currently deployed worldwide and are beyond economical repair. The other four terminals are to be issued to increase their SATCOM capabilities. This proposed action is considered to be a short-term solution for the procurement under the current contract until the follow on contracts are awarded in September 2005. The cumulative value of this contract, including this modification is \$71,663,472, an increase of \$40,092,162. This contract is expected to be completed by December 2005. Contract funds will not expire at the end of the current fiscal year. This order was not competitively procured, and is a follow-on procurement to a competitively placed order. A notice of intent to increase the value of the existing contract was issued on 5 October 2004. No responses were received. The Space and Naval Warfare Systems Command, Charleston, S.C. is the contracting activity.
